- Pressure relief valve 15# (Steam)
- Pressure reducing valve
- Zone valve head (1 per year)
- Pressure and temperature gauge

## Tank-Guard

---

### Oil Tank Protection Program

If you have an oil tank leak that is covered by the TANK-GUARD warranty program, your oil tank will be replaced at no charge (parts and labor). Removal and disposal of your old oil tank is included. This warranty is provided directly by Lincoln Laboratories.

Your oil tank is eligible if it has not been repaired at anytime and is not leaking now. Underground tanks and tanks of more than 330 gallon capacity are not eligible. Please refer to warranty statement for details.

*\*additional charges for tune-up requiring more than 1.0 hour labor may apply.*

*Service to be performed  
Monday-Friday from 8:30AM-4:30PM.*

Complete this form and mail to:  
Stadium Fuels & Service, Inc.  
P. O. Box 2206, Peabody, MA 01960

### *Standard Service Contract General Terms and Conditions*

Issuance of the Standard Service Contract is subject to inspection and approval by our service technician. If the system does not qualify for our Premium Service Contract, you will be charged for a tune-up if it is performed. We reserve the right to cancel renewal of the Standard Service Contract if upon inspection our service technician finds the heating system to be in poor working order or unsuitable for servicing by us. Only parts specifically listed in the contract are covered. This plan does not cover repairs (parts or labor) to components such as ducts, piping, radiators, zone valves, fuel tanks, vent alarm or any parts associated with water or steam (including flushing of steam boilers) or to the smoke pipe or the chimney. It does not cover service calls due to run-out of fuel when not the fault of the company or when alternate heat or heat sources are in use, or due to abuse, furnace switches turned off, blown fuses or tripped circuit breakers, flooding, inadequate ventilation of the system, vacant and unattended premises. Extra charges will apply due to delay or extra expense due to the inaccessibility of the system. All non-covered parts and services will be billed at our prevailing rate. This contract is not a guarantee that the equipment will not fail to operate. It is an agreement to maintain and repair the equipment as provided for in the contract. We are not responsible for any damages due to any type of malfunction, leaks or environmental impairment, including consequential damages, unavoidable delays beyond our control or for work required as a result of abnormal conditions, such as floods, hurricanes, blackouts, freeze-ups, broken pipes or any acts of God, the government or other parties. No warranty is made as to the ability of the system to supply heat or hot water required by customer. OUR LIABILITY UNDER THIS AGREEMENT IS LIMITED TO THE REASONABLE VALUE OF THE SERVICE AND PARTS OFFERED IN THIS CONTRACT NOT TO EXCEED \$1,000.00. The service agreement will be automatically canceled without further responsibility on our part in the event that your automatic deliveries are terminated, or fuel purchased fail to meet minimum of 500 gal/year. There will be no pro-rated refunds for early termination of the contract.

This plan covers residential burners up to 3 GPH firing rate. General Electric, and rotary and low speed (1725 RPM) burners are excluded.
